### **DETAILED ACTION**

Upon further consideration, the previous finality is being withdrawn.

With new art and rejections are following:

Claims 1-2 and 4-12 are pending.

Claim 3 has been cancelled.

### ***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "36" has been used to designate both: a corner (original specification filed on 6/16/2005 on page 9, line 27) and the indication (in the amended specification filed on 5/30/2008 on page 3, line 1). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the longitudinal extending cord member accommodated in the corner segment must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7-8 recite the limitation "the pattern". There is insufficient antecedent basis for this limitation in the claims.

Claim 8 recites the limitation "the oblique indication". There is insufficient antecedent basis for this limitation in the claim.

Claim 8 recites the limitation "the oblique indication being directly or indirectly connected to a free edge of the sheet section" is confusing and indefinite because it's not clear "oblique indication" is? Clarification is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-5 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No. 6,725,610 to Murphy et al.

Claim 1:

Murphy et al. disclose in Figs. 3, 3a, 3b and 3c, a sheet flashing member comprising: a sheet section defining a plane and including a main portion 26 (Figs. 3a or 3b) as well as first and second corner segments 34/35, the main portion 26 are capable of extending along a portion of a roof penetrating structure and the corner segments 34/35 extending along other portions of the roof penetrating structure perpendicularly to the main portion, and at least one flange 31 or 33 arranged at an angle relative to the plane of the sheet section and adapted to engage a surface of a roof penetrating building structure, comprises in that at least one of said corner segments 34/35 at a surface thereof comprises at least one indication 28 comprising a weakening section, such that

Art Unit: 3635

at least a part of the sheet section separable from the remaining part of the flashing member along the indications in order to transform the respective corner segment from an initial state to a transformed state.

Claim 2:

Wherein each said indication 28 comprises a visual indication in the shape of at least one longitudinally extending line.

Claims 4-5:

Wherein said weakening sections 28 includes at least one groove formed by depression.

Claim 7:

Wherein the pattern defines one or more indications delimiting an area 38 of an end portion which, when separation has taken place, is able to be removed.

Claim 8:

As best understood, wherein the sheet section 26 has a general longitudinal orientation, the pattern defining at least one indication 38 arranged at an oblique angle relative to the general longitudinal orientation, the oblique indication being directly or indirectly connected to a free edge 29 of the sheet section.

### ***Allowable Subject Matter***

Claims 6 and 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1, 2, 4, 5 and 7-8 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
